

WalkingWorks Mobile Application

Mobile Application Overview

The WalkingWorks mobile application serves as another platform for members to access the WalkingWorks program, allowing them to quickly and easily record their activity through their device and/or take advantage of built-in features (device pedometer).

- Available for both iOS (Apple Phones) and Android (Samsung, etc.)
- Application is free of charge
- Members who already have accounts on WalkingWorks can log-in with the same credentials they use to access the desktop version

Mobile Application Wearable Integration

In 2015, the app will integrate with any device that currently integrates with Apple Health or Google Fit. Below are some of those devices:

iOS Apple

- Apple Watch
- Jawbone up24
- Jawbone UpMove
- Polar Loop
- Garmin Vivofit 2
- Misfit Shine
- Pebble Steel
- Wahoo Fitness
- Huawei Talkband B1
- Nike Fuelband

Android

- Polar Beat
- Android Wear
- Plexfit for Pebble

Apps

- MyFitnessPal
- Map my Run
- Human

Mobile Application Features

- Track steps through synchronization with Apple Health Kit or Google Fit
- Enter activities manually
- Track your progress
- Track your team's progress
- Set goals and track against those goals

To download the mobile application, go to the iTunes store (Apple) or the Android app store and search for "WalkingWorks"
