General MT Advisement Information

- The difference between the MT Certificate and the MT AAS degree is that the Certificate does not require students to complete additional Liberal Arts courses.
- The MT program is fall semester start only. Students who wish to begin the program in the spring semester will have an additional semester added to their studies.
- The MT program Orientation for new students is held the week prior to the start of the fall semester.
- MT students are required to complete all MT and science courses as seated courses and cannot take these courses online.
- While this is a credit-bearing program, there are also “clock hours” considerations and students should not miss class
 - No more than 2 absences are allowed in clinical courses
 - All other courses will observe the attendance policy as stated in the course syllabus
 - Students must make up coursework and/or hours if they have extenuating circumstances
- For the Certificate, BIO 130/130L and BIO 131/131L must be completed before the start of the second semester.
- Open labs are scheduled as needed to practice skills – see the Program Director

- Students may register for the Mercy Action Project in any semester as long as the requirement is completed prior to graduation.
- Board exams are held in August and January
